

ARCHITECTURAL WALL COLLECTION

# our mission

*Our mission at Barbican revolves around a single purpose: to reduce the wasteful impact of traditional commercial spaces. With the development of sustainable and transformable components, Barbican is revolutionizing how complete interior environments can be built.*

*To achieve this pursuit, we promote a culture rich in research and development and open communication. Barbican responds to the current needs of our customers while innovating for the future demands of commercial interiors and the people using these spaces.*

*With a focus on developing novel materials and applications, we practice collaboration and connectivity with our employees, suppliers and partners to drive changes in the way an interior space is created by offering a full office solution that is fluid and receptive to change.*

*Success in creating a synergistic space that is comfortable and modifiable while minimizing environmental impact offers its own reward: a safer, sustainable future.*

Barbican introduces the Barbican Architectural Wall Collection.

The Barbican Architectural Wall Collection encompasses three systems to provide appropriate solutions for any built environment. The solutions are fully integrated and offer an exceptional level of fit, finish, flexibility and functionality at compelling prices.

Our solutions are “made to order” and we understand the need to deliver projects as realized; on time, complete and within budget.

*Please note that not all products displayed in our literature and website are standard and/or stocked items. Some products shown are custom and may require extended lead times. Please contact your local Barbican representative.*

## OFFICEWALL SYSTEMS

**S200** ..... Single Layer Glass Partitions **pg. 8**

A seamless glass “store front” system, compatible with the S400 and S100.

A modular storage wall system, compatible with the S200 and S400.

**Details** ..... **pg. 28**

S200 series

# S200

## Single Layer Glass Partitions

Transparency. The S-200 is an aluminum trimmed seamless glass system capable of accommodating 3/8" and 1/2" safety glass of any specification. The minimally designed aluminum framing offers a multitude of finish options from anodized to powder coat. The S-200 integrates with S-400 and S-100 systems.

10 | \$200

# S400

## Partition Walls

Foundation. The S-400 is a “frame and tile” system and is the “workhorse” of the Barbican Architectural Wall Collection. It provides unparalleled capability in handling technology, finishes and materials. The S-400 integrates with S-200 and S-100 systems.

S400 | 19

20 S400

# S100

## Storage Partitions

Unique. The S-100 is a modular case-good storage-based wall alternative. The S-100 can be configured based on the end-user's requirements and provides an efficient use of space. The S-100 can be integrated with the S-200 or S-400 or it can be a stand-alone solution.

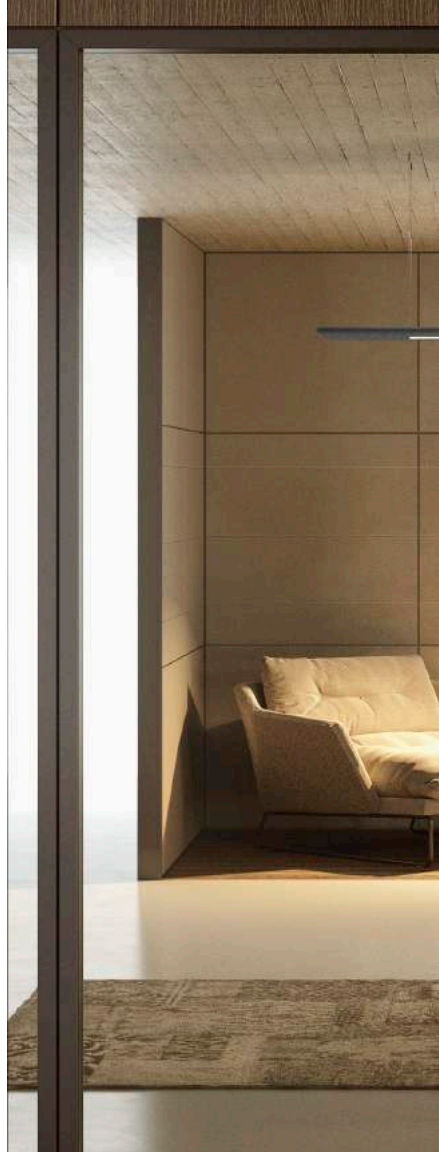

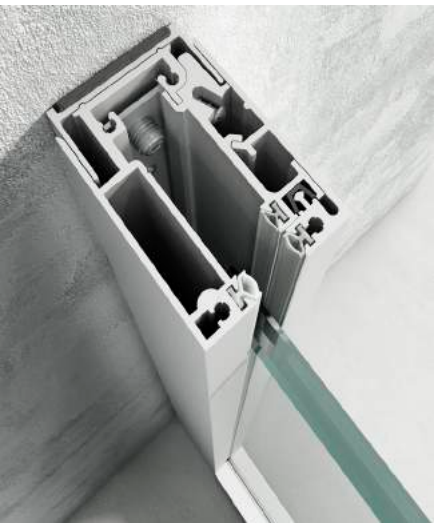

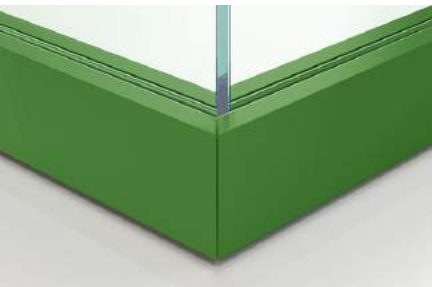

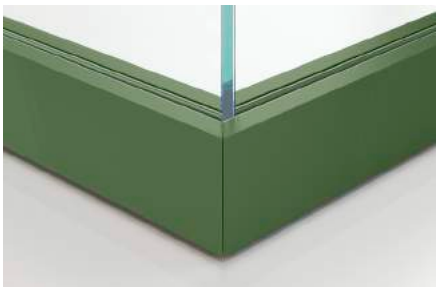

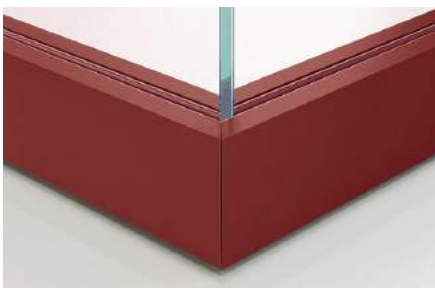

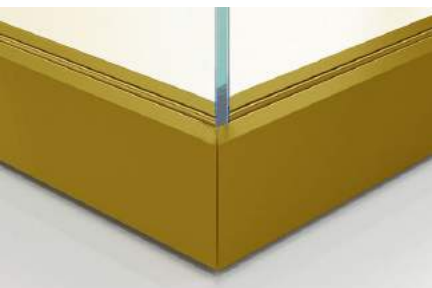

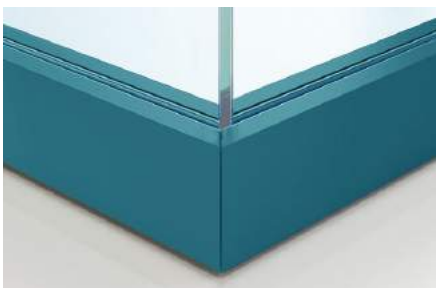

# Details

## Whole Office Solutions

The Barbican Architectural Wall Collection is a design driven product offering. An integral element of achieving the overall design aesthetic are the details. Barbican Architectural Products prides itself in its attention to details in walls, ceilings and lighting.
